## Nu-Rekall®

**60,000,000** people report experiencing depression each year.  
Approximately **3,000** commit suicide each day!

---

*Current mainstream treatments, methodology, beliefs and protocols for addressing mental disorders are grossly outdated and dissatisfactory.*

Nu-Rekall™ is an **emerging new industry** set to replace current global mental health procedures.

The current annual global cost for mental health is over **(2T) trillion dollars**, set to expand to **(6T) trillion** by 2030.

**Nu-Rekall® has a solution; 'US32699' is a memory cognition coding that initiates at will *spontaneous remission* for; depression, anxiety, phobias, bipolar, manic behavior, coping mechanisms, P.T.S.D. and suicidal ideation. Those that qualify for the treatments experience **(100%)** spontaneous remission.**

---

**Spontaneous Remission Psychology:** Effect refers to the sudden disappearance of a disorder or unexpected improvement in a disease. The recovery is unexpected because the patient was either not receiving any treatment at all or they were receiving treatment that is considered to be ineffective. \*Source: <https://www.alleydog.com/glossary/definition.php?term=Spontaneous-Remission%20Effect>

Nu-Rekall® is a trademarked name and unique system for treating mental disorders. Newly discovered universal laws of the mind are initiating a ***spontaneous remission*** in mental disorders.

**The big shift in treating mental disorders by Nu-Rekall® systems is one of moving away from a symptomatic treatment ideation to a causation treatment. Nu-Rekall™ methodology brings order and structure to the abstract area of mind science. The cause is always the same, but the effect is limitless.**

**Nu-Rekall®** is literal for the exact process of how to change the hierarchy of past targeted memories creating, or triggering a spontaneous remission and/or creating new powerful memories; giving a hierarchical New Recall in targeted segmented memories that are unwanted and/or wanted in order to direct behavior/decision making in the human species. Nu-Rekall® is also set to assist the evolution of artificial intelligence in the architectural framework mimicking the human behavior thought processes.

**Behavior** is a learned response based on prior life experiences (85%) and/or through external environmental influences (15%) i.e.; poisoning, heavy metals, allergies, exedra.

**Decision/choice** is determined by our desire to seek out pleasure and/or pain avoidance.

Nu-Rekall® C/O Matthew Dovel 1736 E. Charleston Blvd., #301 Las Vegas, Nevada 89104  
phone: 702 743 4340 | website: [Nu-Rekall.com](http://Nu-Rekall.com) | email: [MDD@Nu-Rekall.com](mailto:MDD@Nu-Rekall.com)

## Memories with a higher level of hierarchy (intensity) have a greater influence over our decision making and/or responses (behavior).

By altering targeted memories and/or groups of associated memories [i.e.: conditioning], then you can create and/or remove associated symptomatic behaviors; depression, anxiety, phobias, P.T.S.D., coping mechanisms and suicidal ideation.

There are (3) Nu-Rekall® publicly released treatments that address specific types of memory trauma:

Depression Anxiety Suicidal Ideation	Phobias Coping Mechanisms	Manic Bipolar P.T.S.D.
<b>'4 Phase' (5) minutes</b>	<b>MTR (15) minutes</b>	<b>P.M.C.H.O. (20) minutes</b>

- Nu-Rekall® treatments have been in use at *International Suicide Prevention* since 2006, with **100%** effectiveness for treating suicidal ideation.
- Nu-Rekall® treatments trigger at will a spontaneous remission within (5) minutes of being treated.
- Nu-Rekall® treatments are **NOT** limited to length of time since an event, or to the severity of an experience.
- Nu-Rekall® treatments are noninvasive and non-medical.
- All (3) publicly release treatments have been copyrighted.
- 'US32699' is a new universal law that governs the altering of memory segments in order to change hierarchy.
- Nu-Rekall® procedures that apply 'US32699' can be either facilitated by a trained professional, or through self-help and/or covertly.
- All Nu-Rekall® treatments are a single application and do not require follow up visits.

## Nu-Rekall® Background

### Research and development of Nu-Rekall® products and services

Development – **Theorizing and research began in 1987** by [Matthew D Dovel](#), scientist in behavioral modification/expert.

Study (*unpublished*) – **2006** preformed Nu-Rekall® procedures on **500** test subjects [*100% spontaneous remission*].

Services – practical application for Nu-Rekall® products was implemented in **2006 to present**. Since 2006, Nu-Rekall® methods and methodologies are in use as the primary treatment at [International Suicide Prevention](#) for; depression, anxiety, phobias, coping mechanisms, P.T.S.D., manic, bipolar and suicidal ideation.

Training mental health professionals in Nu-Rekall® - procedures, policies, methodology, theory, and application **began in 2015**.

**Experience in working with;** *Law Enforcement, Mental Health Professionals, Governmental Officials* [National & Global], *Military* [Leadership & Enlisted educational training], *Educational Systems* [private & public], *Community educational services*.

**Nu-Rekall®** trademark filed on **3/28/2016**

**Nu-Rekall®** trademark status as of **5/4/2017** [*Published for opposition*]

**Nu-Rekall®** trademark approved **7/18/2017** – **Name and system for treating mental illness.**

---

### CURRENT COST OF TREATING P.T.S.D. AND T.B.I.

IN THE FIRST YEAR OF TREATMENT, THE COST OF TREATING A TYPICAL PATIENT WITH P.T.S.D. AVERAGED **\$8,300**, ONE WITH T.B.I. **\$11,700**, AND ONE WITH BOTH **\$13,800**. THE AVERAGE COST OF THE FIRST YEAR'S TREATMENT FOR A PATIENT WITH NEITHER DIAGNOSIS WAS **\$2,400**.
